

Educator Credentials Page/Resume. - A short paragraph about you (150 words), your education overview (list the degree program, major, specialization focus, estimated completion date, and school/college of the program you are pursuing -- you can include high school, certifications, and other details), and a favorite quote or saying.

- I originally came to Mizzou to study Computer science. The reason that I switched to informational technology was because the classes offered for the course were only serviced during the time of my baseball practices so it was a better fit. I am able to take my high end coding prowess to help me achieve my cyber security certificate and finish my INFOTEC degree. This semester I will receive my certification, and next spring I will be getting my diploma. In highschool I took an intro to coding class and that's how I got my feet wet. I had also been voted the scholar athlete of the school and was able to speak during graduation. My biggest message was for people to enjoy the downtime. We will not always be able to be in the limelight. There are times where you will need to put your nose to the road and get work done without people watching and patting you on the back. "Enjoy the silence".
